

Male Clothes moths are attracted by a specific pheromone and get caught on the non-drying glue on the upper surface of the trap. Infestations are reduced as the female moths do not mate. The trap will last for about 12 weeks after the protective paper is removed.

- The trap is ready to use, and lasts up to 3 months
- The Clothes Moth Trap is triangular when assembled, and has a glue coating to all three inner surfaces.
- The trap is designed to be stuck inside wardrobes using the adhesive strip, or can be used free-standing when folded.
- The trap contains a pheromone to attract male moths to the non-drying glue on the inner surfaces of the trap.

Directions for use:

1. Separate traps from one another
2. Remove protective paper
3. Push tab through slots to assemble
4. Ensure trap is accessible by moths
5. Avoid draughty areas and check regularly
6. Replace after 12 weeks or when glue is covered with moths
7. Dispose of trap in domestic waste
