

Promotes strong healthy leaf growth on herbaceous ornamentals, vegetables, herbs and architectural and other foliage plants in the garden and home.

This high nitrogen feed with added potash and trace elements can also be used on lawns during the spring and summer to stimulate the growth of healthy green turf.

#### DIRECTIONS FOR USE

Apply using watering can or hose-end dilutor.

#### For foliage plants and green vegetables:

**As a weekly feed:** Add 10 g (2 teaspoonsful) to every 6 litres (1½ gallons) of clean, cold water. Stir to dissolve and water the soil or growing media thoroughly around the base of plants as far as the leaves spread. Apply at weekly intervals throughout the season.

#### To feed at every watering:

Add 5 g (1 teaspoonful) to every 9 litres (2 gallons) of clean, cold water. Stir to dissolve and water the soil or growing media thoroughly with the feed in place of normal watering.

#### As a lawn fertiliser:

Mix 20g (4 teaspoonsful) in 6 litres of water and apply evenly over 10 m<sup>2</sup> (12 sq yds) using a watering can fitted with a fine rose. Re-apply at 6 week intervals from April to September.

#### STORAGE

If carefully stored the fertiliser will keep indefinitely. After use, re-seal the pack tightly and store in a cool, dry place.

#### ANALYSIS

##### EC FERTILISER

##### NK Fertiliser 36 0 12 with Trace Elements

Total Nitrogen (N)	36.0%
of which: nitric nitrogen	3.3%
ureic nitrogen	32.7%
Potassium Oxide (K <sub>2</sub> O)	
soluble in water	12.0% (10% K)
Total Boron (B)	0.013%
Total Copper (Cu) chelated by EDTA	0.025%
Total Iron (Fe) chelated by EDTA	0.050%
Total Manganese (Mn) chelated by EDTA	0.025%
Total Zinc (Zn) chelated by EDTA	0.009%

##### NK Fertiliser 36-0-10 With Trace Elements

Total Nitrogen (N)	36%
Of which nitric Nitrogen	3.3%
Ureic Nitrogen	32.7%
Potassium (K) Soluble in water	10%
Total Boron (B)	0.013%
Total Copper (Cu) Chelated by EDTA	0.025%
Total Iron Chelated by EDTA	0.05%
Total Manganese Chelated by EDTA	0.025%
Total Zinc (Zn) chelated by EDTA	0.009%
