A dustable powder containing 0.051% deltamethrin

UK-2017-1104

IE/BPA 70394

Nippon Fast Acting Ant Killer Powder is a dustable powder insecticide for use against crawling insects including cockroaches, spiders, ants and bedbugs by crack and crevice treatment indoors. Also for use outdoors on and around ant nests.

#### INSTRUCTIONS FOR USE

Apply directly by dusting using the puffer pack.

##### **Indoor application in crack and crevices:**

Apply 20g of product in thin layers in cracks and crevices where insects hide (under furniture, corners, etc.). Use up to 2 applications per year with a minimum interval of 6 weeks between treatments.

##### **Ant nest treatment (indoor and outdoor):**

Apply in thin layers on the area surrounding the nest entrances and/or injected into the nest entrances at a maximum rate of 2 grams product per nest. The outdoor application can be performed once per nest up to a maximum of 5 nests around houses. Shake well before use. Remove cap and holding container pointing slightly downwards, squeeze gently to apply a fine stream of dust. Replace cap after use. The puffer pack will dispense 2g per 2 second squeeze. Always read the label before use and follow all the instructions provided. Do not apply in case of rain or wind. To reach nests located under terraces, apply the product carefully in cracks and crevices or between tiles and avoid run off of product. Apply only in areas not liable to flooding or becoming wet, i.e. protect from rain, floods and cleaning water. Follow good hygiene practices: remove or prevent access to all sources of food. If the infestation persists despite following the label instructions, contact a pest control professional.

**PRECAUTIONS:** Wash hands before meals and after use. Do not mix with other chemicals or products. Avoid contact with treated surfaces. Do not apply when people (especially children), pets or animals are present. Apply so that children and pets do not come in contact with the product. Do not apply in presence of food/feedstuff. Before treatment, cover water tanks, feed, troughs and other food/feed contact surfaces or equipment. Remove any kitchen utensils during treatment. Do not contaminate ponds/lakes, water pipes or ditches with the product or empty container.

#### Warning

Very toxic to aquatic life with long lasting effects.

If medical advice is needed, have product container or label at hand. Keep out of reach of children.

Read label before use.

Avoid release to the environment.

Collect spillage.

Dispose of contents/container in accordance with local/national/international regulations.

**SHELF LIFE: 3 years**
