

# ULTRASONIC PEST REPELLER

- Humane
- Chemical free ultrasonic technology
- Repels mice, rats and insects

50m<sup>2</sup> range 

Can be used in homes, garages, offices, sheds.

## QUICK AND EASY TO USE

# ULTRASONIC PEST REPELLER

This Nippon Pest Repeller uses high frequency ultrasonic sound waves that are set within the hearing range of rodents and other common household pests. The sound is inaudible to humans, cats, dogs and most other household pets. The ultrasonic frequency sounds like an extremely loud siren to rodents and drives them from the protected area. This unit is designed to provide ultrasonic coverage within a single room.

#### HOW TO USE:

1. Plug the repeller into a socket in or near to the area to be protected. The red light indicates the power is on.
2. The flashing green light means the repeller is emitting high frequency ultrasonic waves.
3. The repeller will cover an area up to 55m<sup>2</sup>

This repeller usually takes 2 - 4 weeks to reach maximum effectiveness.

50m<sup>2</sup> range 

Model No: 040567  
Rated Voltage: AC220V 50/60Hz  
Rated Output: 4W
