WOOD LICE KILLER

For indoor
and outdoor use
Long lasting – up to 6 months

Contains 0.488% w/w permethrin

An efficient contact
insecticide for use on
woodlice, ants, wasps,
cockroaches, beetles,
earwigs, silverfish and
other crawling insects.

DIRECTIONS FOR USE

Remove cap. Hold container pointing slightly downwards and apply as a fine dust to surfaces. Replace cap after use.

Woodlice, cockroaches, beetles, earwigs, silverfish and other crawling insects: Apply around hiding places, cracks, crevices and other entry points such as doorsteps, window frames, airbricks etc. Leave powder undisturbed and re-treat as necessary.

Ants: Where possible open up the nests, dust well and tread down. Dust along the ant runs, cracks, crevices and other places. Entrances to nests should be liberally dusted particularly in cases where the ants cannot be disturbed. Where ants are invading premises apply to points of access such as doorsteps, window frames, air-bricks, etc.

Wasps: Apply dust liberally into the nest or apply in piles at the nest entrance. Treatment is best carried out in the evening or on dull days when wasp activity is at a minimum. Take care not to disturb the colony and do not return to the nest until all wasp activity has ceased.

Note: Do not use on soft furnishings.

CONTENTS MAY SETTLE AFTER PACKING, SHAKE WELL BEFORE USE

STATUTORY CONDITIONS RELATING TO USE

FOR USE ONLY AS AN INSECTICIDE
Apply as a crack/crevice treatment at 20 g/m².

Re-treat as necessary.

Other Uses: Apply as required. Re-treat as necessary.
