- | | |
|---------------------------------|--|
| Protective equipment | In normal use conditions personal protective equipment is not deemed to be necessary. If there is a potential for excessive exposure the following applies: |
| Engineering measures | Provide adequate general or local exhaust ventilation. |
| Respiratory equipment | Wear respirator with a particle filter mask (protection factor 4) conforming to European norm EN149FFP1 or equivalent. Respiratory protection should only be used to control residual risk of short duration activities, when all reasonably practicable steps have been taken to reduce exposure at source e.g. containment and/or local extract ventilation. Always follow respirator manufacturer's instructions regarding wearing and maintenance. |
| Hand protection | Wear CE Marked (or equivalent) nitrile rubber gloves (minimum thickness of 0,4 mm). Wash when contaminated and dispose of when contaminated inside, when perforated or when contamination on the outside cannot be removed. Wash hands frequently and always before eating, drinking, smoking or using the toilet. |
| Eye protection | Wear goggles (conforming to EN166, Field of Use = 5 or equivalent). |
