

Superphosphate

A quick acting traditional fertiliser to encourage strong root growth and healthy plants, Vitax Superphosphate is one of the keys to success when planting out seedlings, rooted cuttings and transplants. Fruit, root and seed crops treated with Vitax Superphosphate will produce higher yields and give improved ripening.

DIRECTIONS FOR USE

Vitax Superphosphate should be applied evenly at the recommended rate, forked or hoed into the surface of the soil and if dry, watered in well.

Seedlings, Rooted Cuttings & Transplants

Prior to planting, 100 grammes per square metre (3 oz per square yard).

Root Crops

Prior to planting, 100 grammes per square metre (3 oz per square yard). As a top dressing, once or twice during the growing season 70 grammes per square metre (2 oz per square yard).

Flowers

Prior to planting, 100 grammes per square metre (3 oz per square yard). As a top dressing, 70 grammes per square metre (2 oz per square yard) in early spring.

Fruit, Trees & Shrubs

As a top dressing: 70 grammes per square metre (2 oz per square yard) applied evenly over the area covered by the branch spread.

HELPFUL ADVICE

Read the directions carefully before use.
Store the fertiliser in a dry place away from children, pets and foodstuffs.
Do not exceed the recommended application rates.
Avoid fertiliser lodging on leaves and stems.
