

Blood, Fish & Bone

Vitax Blood, Fish & Bone contains the three major nutrients essential for strong and healthy growth. Nitrogen encourages strong growth and healthy rich green foliage, whilst the slow, steady release of phosphate promotes vigorous root growth. The added potash promotes flower colour and improves ripening in fruit and vegetables.

DIRECTIONS FOR USE

Apply from February until the end of the growing season in October. Evenly apply to soil at the rates recommended below, preferably when the soil is moist. Lightly hoe into the top surface of the soil and, in dry conditions, water in.

Note: 1 gloved handful contains approximately 35g.

PRIOR TO SOWING OR PLANTING:

Apply 140g/m² (4oz per square yard) and lightly fork or rake into the soil.

AS A TOP DRESSING:

Apply 70g/m² (2oz per square yard) around the plants and fork in lightly. Re-apply at 70g/m² (2oz/ sq yd) after 6-8 weeks when plants are actively growing.

Should rain not fall within 24 hours, water in well.

HELPFUL HINTS

Read the directions carefully before use.

Store the fertiliser in a dry place away from children, pets and foodstuffs.

Some animals (particularly dogs) may be attracted to Blood, Fish & Bone and may attempt to eat the product. To reduce attraction and palatability mix well into the soil after application.

Product may irritate cut or broken skin. Wash hands after use.

Do not exceed the recommended application rates.

Avoid fertiliser lodging on leaves and stems.
