

ORGANIC

Bonemeal

Vitax Bonemeal is an organic fertiliser which provides both phosphate and nitrogen, two elements essential for healthy plant growth.

This slow, steady release of nutrients over a long period makes Vitax Bonemeal an ideal fertiliser for bulbs and herbaceous plants, shrubs, roses, fruit trees and strawberries.

DIRECTIONS FOR USE

Apply from February until the end of the growing season in October. Evenly apply to soil at the rates recommended below, preferably when the soil is moist. Lightly hoe into the top surface of the soil and, in dry conditions, water in.

Note: 1 gloved handful contains approximately 35g.

PRIOR TO SOWING OR PLANTING:

Apply at a rate of 140 g/m² (4 oz/ sq yd) to the soil and mix in well.

ESTABLISHED ROSES, SHRUBS AND BORDER PLANTS:

Apply as a top dressing in the spring at 140g/m² (4oz/ sq yd) gently working it into the surface and re-apply at 70g/m² (2oz/ sq yd) every 6 weeks when plants are actively growing.

FRUIT TREES AND BUSHES:

Apply as a top dressing in the autumn at 140g/m² (4oz/ sq yd).

Always wear gloves when gardening

HELPFUL HINTS

Read the directions carefully before use.

Store the fertiliser in a dry place away from children, pets and foodstuffs.

Some animals (particularly dogs) may be attracted to Bonemeal and may attempt to eat the product. To reduce attraction and palatability mix well into the soil after application.

Product may irritate cut or broken skin. Wash hands after use.

Do not exceed the recommended application rates.

Avoid fertiliser lodging on leaves and stems.
