Lawn Care

ENHANCE

ONDS
Technology

What is ONDS?

Vitax have taken technology used in the professional sports turf industry and it is now available for the first time to the home owner to help you achieve a lawn to be proud of. ONDS, or Organic Nutrient Delivery System, is a unique combination of amino and humic acids coupled with nutrients derived from organic sources.

What does ONDS do?

ONDS ensures that the nutrients are targeted exactly where the grass needs them, in the roots. This means that much less of the fertiliser is washed away compared with ordinary lawn feed, giving professional quality results from much lower usage.

ONDS ensures
nutrients are delivered
to the grass and not
washed away

The most advanced
liquid lawn feed
available

DIRECTIONS FOR USE

Apply at any time from March to September in wet or dry conditions, even on newly established or freshly germinated lawns. Apply 2 or 3 times in growing season to maintain grass vigour. For a quality lawn, spray at monthly intervals.

APPLICATION RATES

Watering Can with fine rose or dribble bar
Mix 2 capfuls in 4 litres of water and apply evenly over 8m² (10 sq yds).
Knapsack or other sprayer
Mix 4 capfuls in 1 litre of water and apply evenly over 16 m² (20 sq yds).

NOTE

One capful contains approx 20 ml. To ensure even application, mark out the area in metre or yard wide strips. Children and pets may be allowed onto treated areas after application. Wash hands after use.

Analysis

UK	
COMPOUND FLUID FERTILISER	
Total Nitrogen (N)	18.0%
Of which Ureic Nitrogen	17.4%
Total Potassium Oxide (K ₂ O)	2.0% (K 1.67%)
IRL	
Low Nutrient NK Fertiliser	
Total Nitrogen (N)	18.16%
Of which Ureic Nitrogen	17.4%
Potassium (K) soluble in water	1.67%
