

Lawn Clear<sup>2</sup>

# FEED & WEED

MAPP 15192  
PCS No. 05785

A soluble concentrate containing 2.1 g/l dopyralid, 9.0 g/l 2,4-D and 10.5 g/l MCPA

### KILLS WEEDS

Dandelion, buttercup, daisy, clover & more

### GREENER & THICKER

Feeds for a rich, healthy lawn

Safety Information  
TOXIC TO AQUATIC LIFE WITH LONG LASTING EFFECTS

If medical advice is needed, have product container or label at hand. Keep out of reach of children. Read label before use. Keep away from food, drink and animal feedingstuffs. If swallowed, seek medical advice immediately and show this container or label. Collect spillage.

UK only: Dispose of empty container in the dustbin. Dispose of unused product in its container at a household waste site (civic amenity site). Contact your local council (local authority) for details.

Ireland only: Dispose of contents/container to a household waste recycling centre as hazardous waste except for empty triple rinsed containers which can be disposed of by recycling. Contact your local council for details.

Contains 1,2-benzisothiazolin-3-one. May produce an allergic reaction.

**To avoid risks to human health and the environment, comply with the instructions for use.** MAPP 15192 PCS No. 05785

# FEED & WEED

A combined lawn feed and selective weedkiller for control of many common broad-leaved weeds in lawns

### INSTRUCTIONS FOR USE

#### When to use:

Controls many common broad-leaved weeds and rapidly greens up the lawn, encouraging grass growth to cover bare areas left by dead weeds.

Apply once a year between April and October when the soil is moist and weeds are leafy and actively growing.

Do not apply in windy weather. Take extreme care to avoid drift onto crops and non-target plants (e.g. trees, shrubs and bedding) outside the target area. Keep spray off cultivated plants and away from ponds and watercourses.

#### Where to use:

Kills weeds present at the time of treatment, but does not prevent weeds from germinating. A second application, of another product, may be required after 6-8 weeks to kill stubborn weeds like buttercups and any weeds that may have germinated later. Test for turf safety on a small area of turf before overall application.

Do not mow for 3 days before and 3 days after treatment to allow full uptake and movement within the weeds. Do not spray on lawns which are less than one year old. Allow at least six weeks between treatment and over-seeding established turf. Do not treat during drought, freezing conditions or in periods of prolonged cold weather. Allow at least six months before sowing or planting broad-leaved plants.

#### How to use:

To treat 12 m<sup>2</sup>, use 2 measures (60 ml) in 6 litres of water when using a watering can with a fine rose or sprinkler bar, or 60 ml in 1 litre of water when applying by sprayer. Set the sprayer nozzle to a medium setting. Avoid too fine a spray as drift onto neighbouring plants may occur.

Half fill the watering can or sprayer with water then add the weedkiller plus remaining water, mix thoroughly and use immediately.

After use immediately wash out equipment with water and detergent to remove all traces of weedkiller, fill with clean water and leave overnight. Spray or drain out again before storing or using another product. Keep children and pets away from treated area until spray has dried.

After treatment, leave the clippings from the first mowing on the lawn. The next three mowings should be composted well, for at least 9 months, before being used as a mulch. Do not dispose of the grass clippings via council composting schemes.

**SAFETY INSTRUCTIONS**  
**Protection during/in use**  
WASH HANDS AND EXPOSED SKIN AFTER USE.

**Environmental Protection**  
Direct spray away from ponds and other surface water bodies. Do not empty into drains. Do not contaminate water with the product or its container.

**Storage and Disposal**  
KEEP PRODUCT IN ORIGINAL CONTAINER, tightly closed in a safe place.

PROTECT FROM FROST
