

A ready for use dilute emulsion for controlling crawling insects.  
Contains 0.015% w/v (0.15 g/l) Deltamethrin - a synthetic pyrethroid effective by contact action.

**Controls crawling insect including ants, cockroaches, fleas, bedbugs, silverfish as well as flying insects in and around the home.**

#### DIRECTIONS FOR USE

Shake the container a few times before use. Turn the spray nozzle by setting the symbol spray and strongly press the lever. Spray on nest, hiding places and insect trails. Pay special attention to any slits, cracks and crevices, especially around pipes, sewer pipes, baseboards.

For control of Pharaoh ants, spray as a barrier around the path leading to the nest/sockets. Sprayed surfaces should form a barrier to the nest/socket. Where trails are not visible, apply where insects are present or surfaces where insects reside.

In the case of re-emergence of insects, the treatment should be repeated after about two weeks.

#### STATUTORY CONDITIONS RELATING TO USE FOR AMATEUR USE. FOR USE ONLY AS AN INSECTICIDE.

**APPLICATION RATE:** Apply directly onto surfaces on which insects walk, including cracks, crevices and other insect harbourage. Users must comply in full with all their legal responsibilities under the Control of Pesticides 1986 (as amended), including complying with all Conditions of Approval. **READ ALL PRECAUTIONS BEFORE USE HSE No. 9724**

This product is approved under The Control of Pesticide regulations 1986 (as amended) for use as directed.

**750ml** e

#### Intended use:

An insecticide for amateur use as a crack-and-crevice treatment for the control of crawling insects such as cockroaches, ants, fleas, bedbugs and silverfish.
