

**USE WHEN NESTS ARE HARD TO REACH OR HIDDEN**

**A MESS FREE WAY TO KILL THE ANTS YOU CAN AND CAN'T SEE!**

**REFILLABLE BAIT STATIONS FOR BETTER VALUE**

**2 Refillable bait stations + Nippon Ant Killer Liquid<sup>2</sup>  
- treats up to 4 ant nests**

Nippon Ant Killer System eliminates ants without mess or trace. Ideal for household use, it has been designed to destroy ants indoors and outdoors around domestic premises. The refillable bait stations can be re-used minimising wastage and the Nippon Ant Killer Liquid<sup>2</sup> can treat up to 3-4 nests. 3-4 drops squeezed into the bait station, placed along the ant run, acts as lethal bait for ants. A clean, mess free way to eliminate ants.

**DIRECTIONS FOR USE**

Pierce the 4 small indentations on the bait station base with a sharp point to allow access to the bait. Undo cap on the liquid and pierce the end seal. Clear up other readily available foodstuffs. Place 3-4 drops (0.3-0.4g) of product per bait point, preferably in the late evening, into a refillable bait station by the ant run. Change the bait daily until ant activity ceases (usually 7 to 10 days). Replenish as necessary. Do not disturb feeding ants, which pass Nippon onto the entire colony. Ants are only controlled if Nippon is the main food source. When used outdoors use a maximum of 3 refillable bait points. Effective for up to 1 month.

Wash hands and exposed skin before meals and after use. Prevent access to bait by children and animals. Keep in a safe place. Hazardous to bees. Do not use where food, feed or water could become contaminated. There should be an interval of at least 7 days between 28-day treatment campaigns.

Remove all remains of bait and bait containers. Do not contaminate surface water or drains with chemicals or used container. Do not re-use container (empty tube). Store in original container. Shelf life up to 2 years. To avoid risks to human health and the environment, comply with the instructions for use.

**FOR USE ONLY AS AN INSECTICIDE**

Harmful to aquatic life with long lasting effects. Keep out of reach of children. Dispose of contents/ container to a household waste recycling centre as hazardous waste except for empty containers which can be disposed of by recycling. Contact your local authority for details. Contains 1, 2-benzisothiazolin-3-one. May produce an allergic reaction. UK-2015-0925 IE/BPA 70341

**1** Pierce through the 4 indentations on the bait station (with a key is ideal)

**2** Remove the lid of the bait station and add 3-4 drops of Ant Killer Liquid

**3** Re-seal the lid and place the bait station on or near the ant run
