

# Sulphate of Ammonia

A quick acting traditional fertiliser which promotes above the ground growth and rich green foliage, Vitax Sulphate of Ammonia is especially beneficial for such crops as brassicas, lettuce, spinach, rhubarb, leeks and onions. An early season feed gives flowering plants, shrubs and fruit a rapid boost.

Vitax Sulphate of Ammonia will quickly green up a tired lawn.

### DIRECTIONS FOR USE

Vitax Sulphate of Ammonia should be applied evenly at the recommended rate, hoed or raked into the top surface of the soil, and if dry, well watered in. Shake off any fertiliser spilt onto leaves.

Note: 1 gloved handful contains approximately 15-17g.

### Vegetables

Prior to planting or sowing, 35 g/m<sup>2</sup>. Brassicas and other leaf crops will benefit from one or two top dressings, 35 g/m<sup>2</sup>.

### Flowers

Prior to planting or sowing, 35 g/m<sup>2</sup>. As a top dressing for established plants, 35 g/m<sup>2</sup> applied evenly over the area beneath the foliage.

### Lawns

To green up tired lawns apply 15 g/m<sup>2</sup> at 4 - 6 week intervals and water in.

Alternatively, apply as a liquid feed. Mix 30g in 6 litres of water and apply evenly over 10 m<sup>2</sup> using a watering can fitted with a fine rose. Re-apply at monthly intervals from April to September.

### Liquid Feed

Dissolve 30g in 9 litres of water and apply in place of normal watering.

# Sulphate of Ammonia

Quick acting nitrogen fertiliser to encourage leafy growth

### HELPFUL HINTS

Read the directions carefully before use.

Store the fertiliser in a cool dry place away from children, pets and foodstuffs.

Wash hands after use. Product may irritate cut or broken skin.

Do not exceed the recommended application rates.

Avoid fertiliser lodging on leaves and stems.

Can also be used as a liquid feed
