

Rabbit Repellent

A natural way to protect lawns and similar areas from rabbit damage

Children and pets may be allowed onto treated areas

Contains nutrients beneficial to plants

Protects up to 150m²

HOW IT WORKS

Stay Off Rabbit Repellent is a natural product designed to protect areas such as lawns from disfiguring surface scratching. Apply as a continuous band around the area to be protected.

Stay Off Rabbit Repellent works by emitting an odour that animals associate with predator activity, repelling the animal. It stimulates a fear-based response causing rabbits to go elsewhere. The odour is not unpleasant to the user.

Stay Off Rabbit Repellent will not harm plants and contains 12% nitrogen, an essential plant nutrient which boosts plant growth and improves turf colour.

DIRECTIONS FOR USE

Shake the pack well to aerate the contents and make it easier to pour. Open the pack and apply the contents as a continuous narrow band around the area to be protected. One pack is sufficient to mark out a continuous band 50m in length and protect an area up to 150m² for 6-8 weeks. The material absorbs moisture naturally from the environment and lightly adheres to surfaces providing an extended period of protection. Reapply at 6-8 week intervals or as necessary to the protected area.

Note: always test on an inconspicuous area before applying extensively to ensure that the product does not stain desirable surfaces.
