STAY OFF

Mole Repellent

A natural, humane way to protect from molehills

HOW IT WORKS

SUITABLE FOR ORGANIC GARDENING

Stay Off Mole Repellent is a natural product designed to protect areas such as lawns from damage from moles tunnelling and producing mole hills. Stay Off Mole Repellent works by emitting an odour that animals associate with predator activity, repelling the animal. It stimulates a fear-based response which will encourage them to move elsewhere.
The odour is not unpleasant to humans.
Stay Off Mole Repellent will not harm plants and contains 12% nitrogen an essential plant nutrient which boosts plant growth and improves turf colour.
Apply dry directly into tunnels or apply evenly over the area to be protected.

DIRECTIONS FOR USE

As a dry powder into mole tunnels:

Check for recent mole activity and, using a garden spade or other suitable garden tool, open up a hole into the tunnel connecting adjacent molehills.
Shake the pack well. Open and squeeze the pack to discharge about 10g Stay Off Mole Repellent into the tunnel. Firm up the soil above the tunnel and repeat along the runs between each molehill.
Finally sprinkle Stay Off Mole Repellent at a rate of 10g/m² evenly over the treated area.
The material absorbs moisture naturally from the environment and lightly adheres to surfaces providing an extended period of protection.
Reapply at 6-8 week intervals or as necessary to the protected area if further molehills appear.

As a preventative treatment:

Sprinkle Stay Off Mole Repellent evenly at a rate of 10g/m² over areas adjacent to mole runs or where moles have previously been active.
Applying Stay Off Mole Repellent to lawns will also provide nutrient, improving grass colour and growth.

Note: Always test on an inconspicuous area before applying to ensure that the product does not stain desirable surfaces.

Children and pets may be allowed onto treated areas

Contains nutrients beneficial to plants

Protects up to 50m²

HELPFUL ADVICE

Read the directions carefully before use.
Store in a cool dry place away from children, pets and foodstuffs.
Once opened reseal and store in a cool dry place. Use within 1 year of opening.
