Enhance Liquid

LAWN FEED

Professional Standard

Scientifically developed to a professional standard, Vitax Enhance Liquid Lawn Feed with amino and humic acids, provides the perfect blend of nutrients for a luxurious, rich green lawn.

The unique Organic Nutrient Delivery System of Vitax Enhance Liquid Lawn Feed directs nutrients straight into the grass roots for maximum uptake and avoids nutrients being washed away through the soil. Regular use will help lawns develop stronger roots which results in healthier, thicker, greener grass. Wetting agents improve resistance against poor weather conditions such as drought.

DIRECTIONS FOR USE

Apply at any time from March to September in wet or dry conditions, even on newly established or freshly germinated lawns. Apply 2 or 3 times in growing season to maintain grass vigour. For the highest quality lawn, apply at monthly intervals.

APPLICATION RATES

Watering can with fine rose or dribble bar

Mix 2 capfuls in 5 litres of water and apply evenly over 8m².

Knapsack or other sprayer

Mix 4 capfuls in 1 litre of water and apply evenly over 16m².

NOTE

One capful contains approx. 20ml. To ensure even application, mark out the area in 1 metre or 1 yard wide strips. Children and pets may be allowed onto treated areas after application has dried. Wash hands after use.

Shake well before use. Protect from frost. Store away from direct sunlight between 0 and 30°C
